RESEARCH INTERESTS

I am broadly interested in Natural Language Processing, Machine Learning, and Information Retrieval. My recent research has focused on multilingual unsupervised syntactic parsing, semi-supervised learning, interpretability and robustness of machine learning algorithms, and understanding social inequality and bias in language.

EDUCATION

The University of Edinburgh, Scotland, UK **2020–2021**
M.Sc. by Research, Informatics

Research Unit: Institute for Language, Cognition and Computation (ILCC)
Research Area: Unsupervised Parsing, Knowledge Graph Completion
Advisor: Prof. Shay Cohen

CMR Institute of Technology, Bangalore, India **2011–2015**
Bachelor of Engineering in Electronics and Communication
G.P.A.: 7.58/10

PUBLICATIONS

Authors who contributed equally are indicated using a superscript ‘dagger’ symbol, i.e. †, while joint (co-) supervision is denoted using a superscript ‘double dagger’, i.e. ‡. All publications, except ‘Preprints’, underwent the peer-review process.

WORK EXPERIENCE

Niki.ai, Bangalore, India **May 2018–Sept. 2020**
Senior Software Developer - NLP

- Developed a real-time pause detection algorithm on speech signals to identify end-of-speech conditions, which was later integrated on-device. Up to an SNR of 8 dB, the algorithm was able to correctly segment with an accuracy of 91% on different lengths of speech.
- Designed a probabilistic model capable of generating a binary outcome and intends to classify if an utterance is valid parse or not at every stage in the conversation. Engineered 63 statistical features from parse tree capable of achieving an accuracy of 97% on the holdout test set.
- Developed a bot that could respond to about 75 FAQs in regional languages and English through a Pooled GRU in conjunction with the FastText model. Customer Satisfaction scores increased by 35%, leading to better assistance at every dialogue stage.
- Built a character-level RNN model to classify utterances as ‘Hinglish’ (blend of Hindi and English) words with minimum lexicon support in combination with a dictionary lookup.
- Implemented an algorithm formed on Likelihood and Reliability scores to automatically generate contextual synonyms at n-gram context and augment concept-grammar data to avoid manual intervention.

Sociograph Solutions, Bangalore, India **Sept. 2016–Feb. 2018**
Data Scientist - Research and Development

- Built a deep learning time series model capable of generating weekly/monthly sales forecasts of products at SKU level with only a few thousands of supervised training data.

- Devised a robust machine learning model to predict and optimize various e-commerce metrics like sales conversion rate, customer lifetime value, average order value, shopping cart abandonment rate for retailers that led to 30% decrease in the drop off rate.
- Created an image search engine capable of recommending similar images based on segmentation as a selective search to increase the MAP by 45% compared to the available benchmark.

Hotify.ai, Bangalore, India**Feb. 2016–May 2016***Junior Data Scientist*

- Aggregated tweets from pre-selected news sources to estimate trending hashtags.
- Created Actionable Insights by analyzing how select Twitter users through A/B testing react to real-time events by organizing frequencies into temporal buckets to observe the distribution of tweets over time.
- Prepared training data of close to 10K samples by carefully examining RSS feeds of news sources and rated each source using factors such as true reach, amplification, and network impact.

INTERNSHIPS

Google Summer of Code (GSoC), Remote**May 2021–Aug. 2021***Student Developer*

Organization: Red Hen Lab

Project: Detecting Joint Meaning Construal by Language and Gesture

TECHNICAL SKILLS

Specialties

Natural Language Processing, Machine Learning, Deep Learning, Reinforcement Learning, Recommender Systems, Time-series Forecasting

LanguagesPython, R, Matlab, Javascript, SQL, HTML/CSS, L^AT_EX**Tools and Frameworks**

Pandas, NumPy, SciPy, Matplotlib, Scikit-Learn, NLTK, Keras, PyTorch, TensorFlow, PySpark, Flask, Django, Docker, Kubernetes, AWS, Jira, Git, Elastic Stack, MongoDB

ACHIEVEMENTS

Secured Top 2% in the Jigsaw Multilingual Toxic Comment Classification Challenge hosted on Kaggle; Won a silver medal. [\[Details\]](#) 2020Finished 2nd out of 479 competitors in the Quality Forecasting in Cement Manufacturing Challenge hosted on CrowdAnalytix; Won \$2,500 as prize money; Winner representing India. [\[Details\]](#) 2019Secured Top 3% in the Quora Insincere Questions Classification Challenge hosted on Kaggle; Won a silver medal. [\[Details\]](#) 2019Selected by [niki.ai](#) to volunteer at the NITI Aayog Indic NLP Workshop for tackling challenges in regional languages concerning NLP. [\[Details\]](#) 2018Secured Top 0.85% in the Cold Start Energy Forecasting Challenge hosted on DrivenData. [\[Details\]](#) 2018Placed 6th out of 2310 competitors in the Predicting Poverty Challenge hosted on DrivenData. [\[Details\]](#) 2018Finished 2nd out of 750 competitors in the Predicting How Points End in Tennis Challenge hosted on CrowdAnalytix; Won \$2500 as prize money; [Featured in Tennis Australia's official press release](#). [\[Details\]](#) [\[Media Coverage\]](#) 2018Placed 3rd out of 2975 competitors in the Click Prediction Challenge hosted on AnalyticsVidhya; Awarded a cash prize of ₹25000. [\[Details\]](#) 2017Finished 4th out of 404 competitors in the Funding Successful Projects Challenge organized by HackerEarth. [\[Details\]](#) 2017Among Top Stack Overflow Users for tags — Python, Pandas, NumPy, Matplotlib with an overall 25000+ reputation score and more than 4 million post views worldwide. [\[Details\]](#) 2016–present

My team was awarded 2nd and 1st place in the Niki Annual Hackathon for the years 2019 and 2020 respectively and won cash prizes. 2019/20
